

Jerwin Abanilla

To secure a challenging position in a dynamic organization where I can leverage my skills and experiences to contribute to the company's success while continuously expanding my knowledge and professional growth.

Experience

Developer • EA Internet Café

= Developed, Maintain and Style MikroTik hotspot login page is a web interface that allows users to authenticate and gain access to a network or internet connection.
2019 – 2023

Selected Project

Microtik Wifi Template

MikroTik hotspot login page is a web interface that allows users to authenticate and gain access to a network or internet connection provided by a MikroTik router with the hotspot feature enabled. This login page serves as the gateway for users to connect to the network and enjoy internet connectivity.

Student Grading System

A software application designed to efficiently manage and track student academic performance and evaluations. It provides a comprehensive framework for teachers, administrators, and parents to record, calculate, and analyze student grades and progress.
